ECS Non-Conformance Report

Welcome to the NCR Home Page !

NCR (Non-Conformance Report) is part of the ECS Non-Conformance Report and Corrective Action(NRCA) System that manages and tracks any changes or defects through out the life cycle of a project. NRCA system utilizes the [DDTS \(Distributed Defect Tracking System\)](#) software tool to record non-conformances. This Home Page provides easy access to DDTs that allows entry of new NCR's into the system and provides a means for interested parties to view the status of NCR's within the NRCA system.
